

Uponor I-Shower

Setting the standard of shower installation

Introducing Uponor I-Shower

Installer's Choice & User's Favorite

Plug-and-Play system for individual shower pleasure

Shower technology has evolved. Inconsistent temperatures, complicated installations, and water waste are problems that modern systems can solve. Users and installers alike expect smarter, cleaner, and more efficient performance.

The **Uponor I-Shower** is a high-performance digital shower system that brings together intelligent design, plug-and-play installation, and intuitive user control. By integrating the electronic mixing unit directly into the Uponor Combi Port flat station, it cuts installation time in half and eliminates the need for complex plumbing and wall drilling. This modern solution delivers hot water instantly, personalized shower experiences, and architectural design freedom, setting the standard of shower installation.

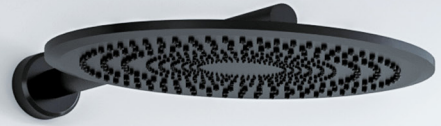

Uponor I-Shower is available in two configurations

Installed in the Uponor Combi Port E-Pro Flat Station for Underfloor Heating and Radiator connection

Stand-alone version to install near the shower area for applications with other decentralized flat stations or with central domestic hot water supply

**Installation
ready**

**Instant
shower pleasure**

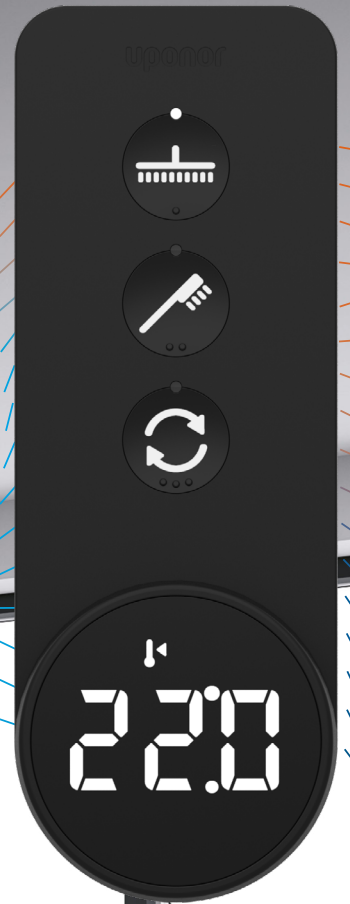

**Individual
comfort**

**Intelligent
design**

Benefits

Built Around Individual Comfort

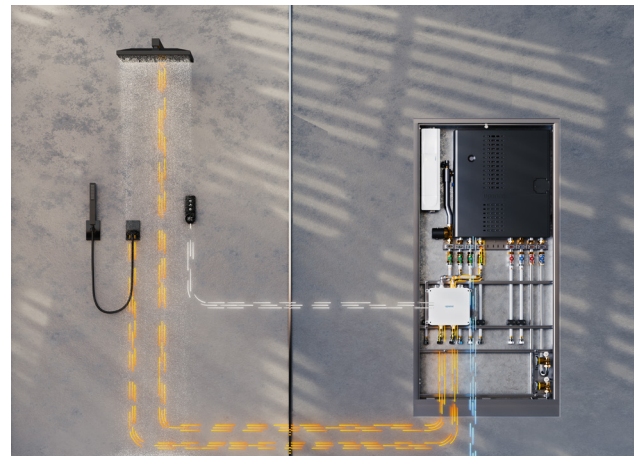

The Uponor I-Shower system is designed with both installer and end-user in mind. Streamlined components reduce installation time, while intelligent temperature control delivers a consistently comfortable shower experience tailored to individual needs.

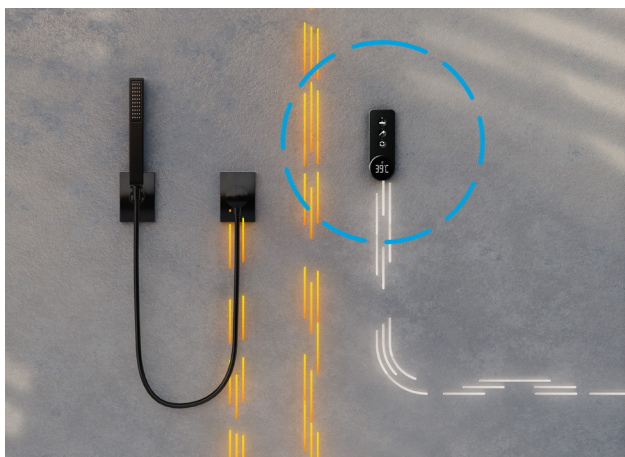

Up to 40% Faster Installation Time

No mixing box to install in waterproofed walls inside the shower area

35% Less Energy Consumption

For hot water supply with decentralized Heat Interface Units

Architectural Freedom

Allows creative freedom with no mixing box required, plus full choice of any head and hand shower

Highest Shower Comfort

Electronic mixer with memory function for user profiles and precise temperature control, cleaning mode, hygienic flushing mode and preheating

For Installers

- **Plug-and-play solution:** simplifies setup and saves time on-site
- **One pipe per outlet:** saves installation time compared to installing an inwall mixing thermostat
- **Time saving:** No effort needed to install and seal inwall mixing box, according to standard DIN 18534

For End-users

- **Comfortable preheating:** your preferred shower temperature right from the start
- **3 Individual profiles:** your choice of temperature and flow at a single press
- **Intuitive operation:** intelligent design and easy to use for instant shower pleasure
- **Energy efficiency:** helps reduce consumption without compromising comfort, providing 35% energy savings thanks to the decentralized Heat Interface Unit

For Architects/Investors

- **Complete design freedom:** offers more space in the shower area and allows full choice of any head and hand shower to match your preferred design choices
- **Easy maintenance:** immediate access to the mixing box

Key Features

Innovative Inside. Intuitive Outside.

Uponor I-Shower combines smart functionality with clean, award-winning design. From customizable profiles to instant water delivery, every feature is engineered to elevate the showering experience while simplifying the work behind the wall.

Intelligent Design

Award-winning Digital Shower Controller for all users

Remote Preheating

Heat your water before stepping in and enjoy instant shower pleasure

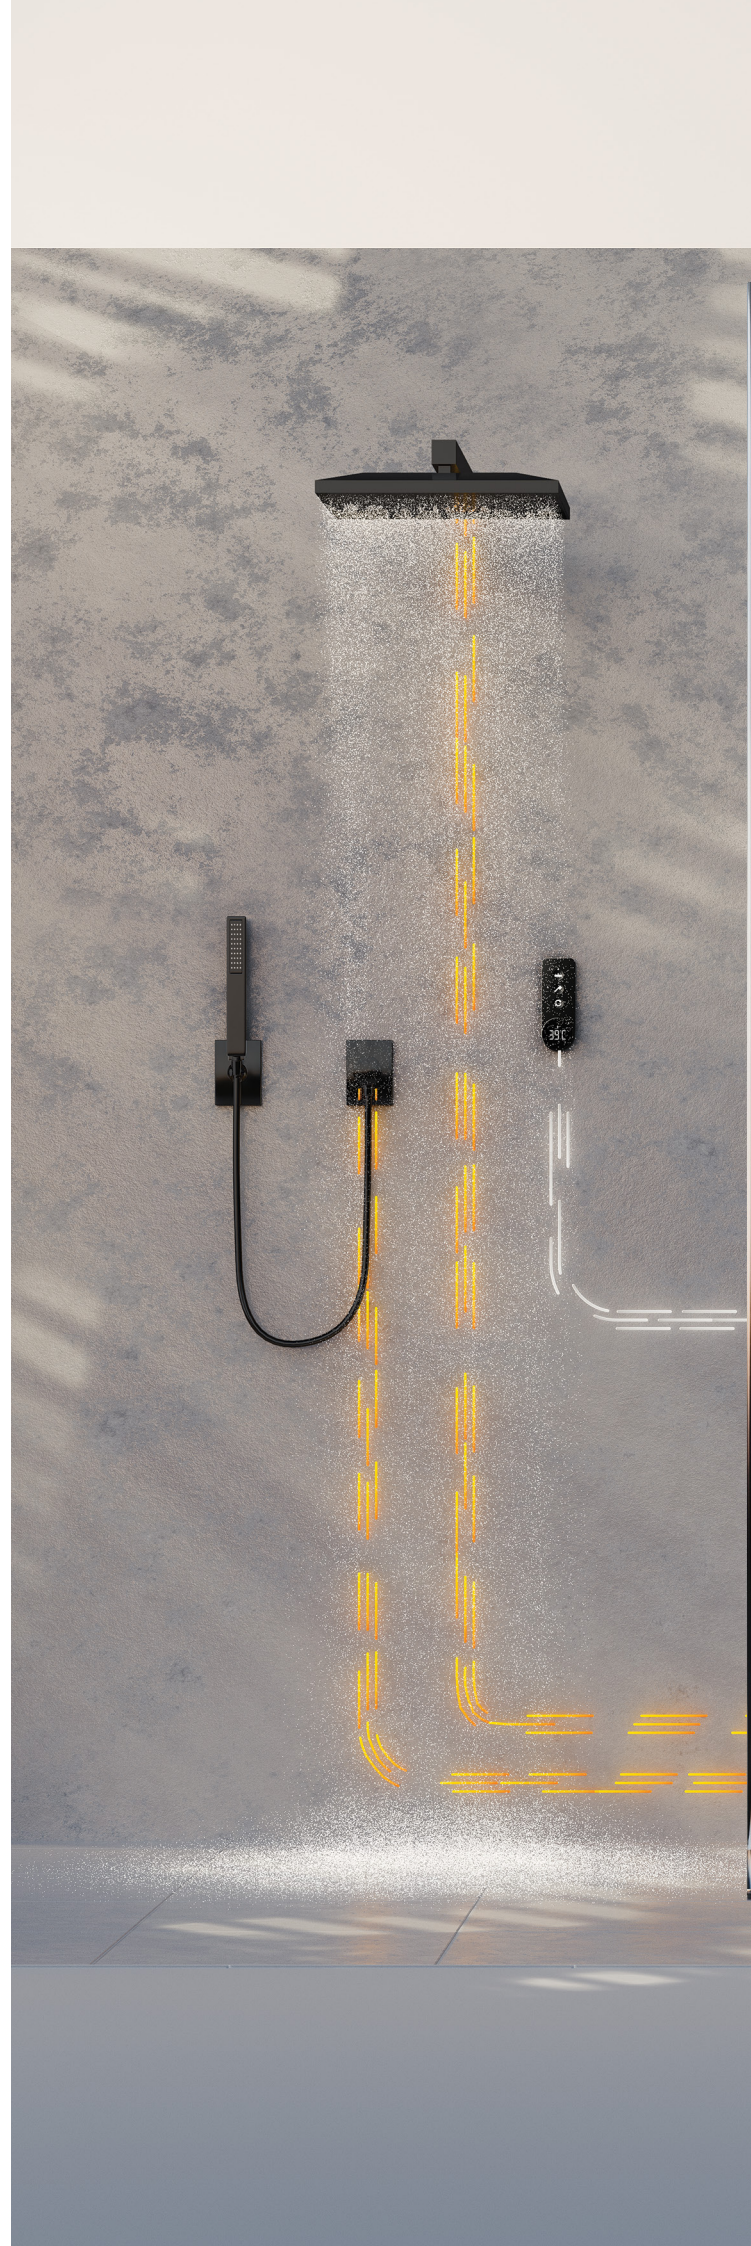

Individual User Profiles

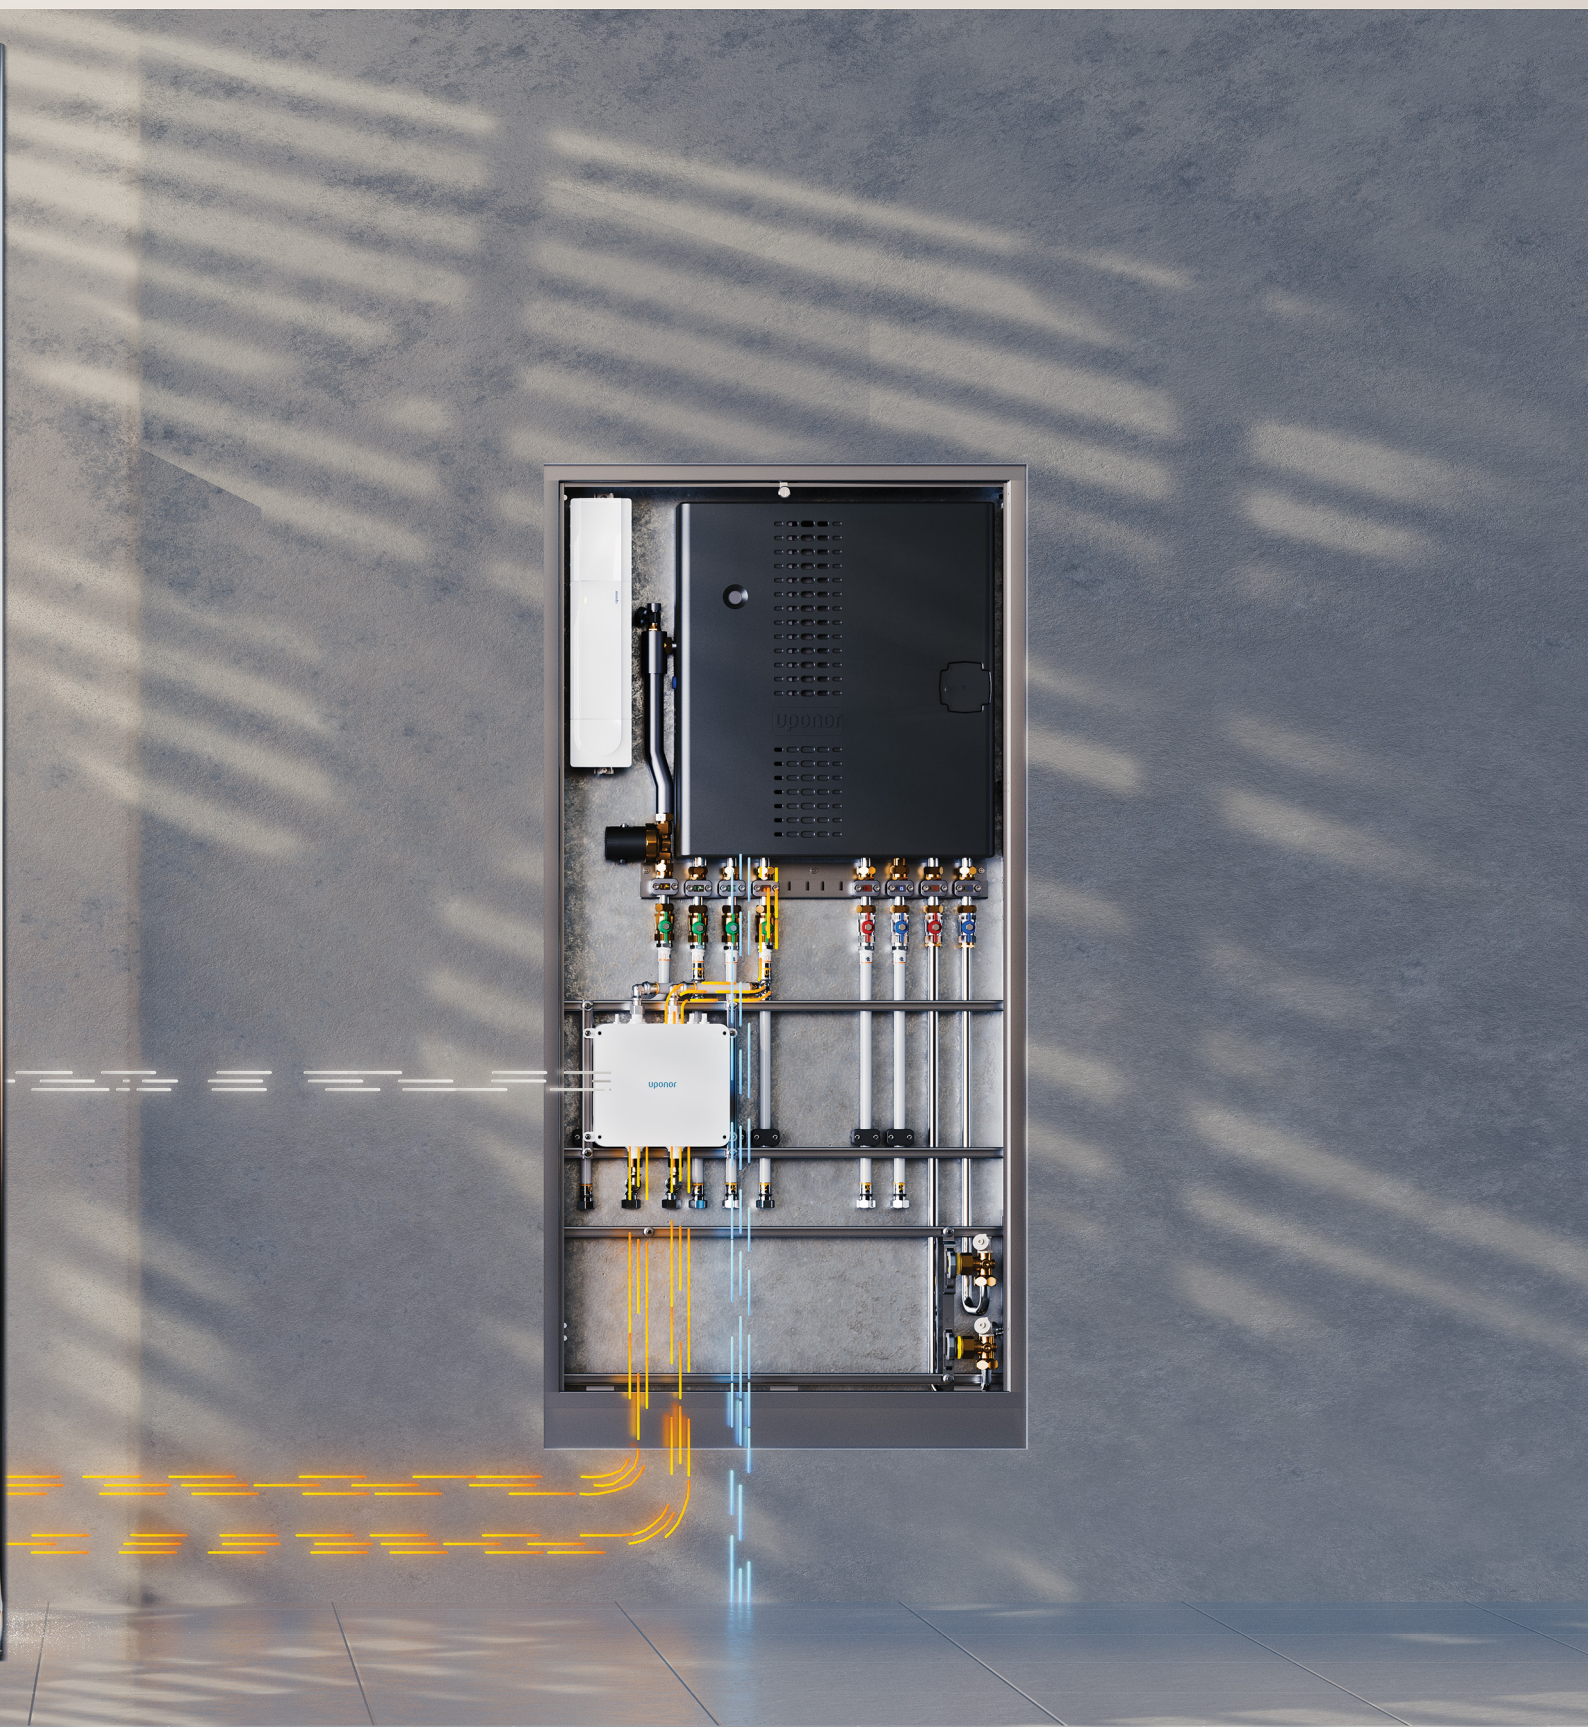

Save your temperature and flow preferences - up to three user profiles

Safety Settings

Customizable limits for minimum and maximum temperature

Engineered for Excellence

Behind every great experience there is a solid system. Uponor I-Shower integrates seamlessly with the Uponor Combi Port flat station, combining proven reliability with intelligent digital control in a compact, installation-ready solution.

Digital Control Unit: Award-winner with precision control and intuitive interface

1. Head-shower Button
2. Hand-shower Button
3. Settings Button
4. Rotary Module for Temperature and Flow adjustment

5. Uponor Smatrix underfloor heating control unit

6. Uponor Combi Port E-Pro: decentralized hot water supply with energy efficiency (up to 35% energy savings)

7. Uponor I-Shower electronic mixing box

8. Area to pre-install Uponor Vario S underfloor heating manifold, from 4 to 10 loops

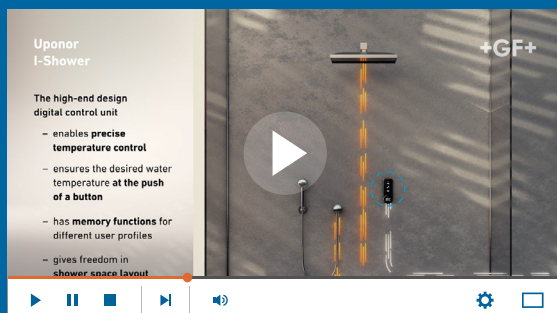

Trust in Every Connection

Uponor I-Shower is a revolution in showering technology. Designed for ease of installation and modern energy-saving solutions, it sets a new standard of shower installation.

See the technology in action and hear directly from our experts about the thinking behind the innovation.
