# Multifunctional Cable chamber 600 x 550

**PE chambers** are adapted to the nordic climate and have a high impact strength.

**Flexible use** The size of the chamber simplifies installation work in the pipe trench and makes it easy to place.

**Installation** The chamber is intended for green areas where there is usually no traffic. It is designed to withstand occasional traffic such as lawn mowers, smaller tractors, etc. Installation depth must be carried out so that approx. 300 mm of filling mass covers the chamber.

It can be installed in traffic areas corresponding 400kN load with cast iron cover and ring.

## Cable chamber 600 x 550

Developed for several different purposes, the chamber is suitable for connecting power cables as well as for telecom installations and cable blowing.

The drawer has a neck on the side for simplified wiring alternatively installation of lighting connections.

Flat surfaces make it easy to install ducts up to dimension 160.

Application	Cable & Telecom
Material	PE
Colour	Black
Dimension	600 x 550mm
Connections	≤ 160mm
Cover	Plastic cover, light traffic and green areas
Standards	EN 124: A15 or D400

# Features of Cable chamber 600 x 550

Cable chamber	Name	Dimension DxH mm	Uponor no	VVS no
	Cable chamber	600 x 550	1050144	
	Cast iron cover D400		1054022	
	Cable chamber ring D400		1059778
