

# Heating & Cooling Solutions

**Maximizing energy savings and sustainability while ensuring comfort.**

GF Building Flow Solutions offers heating and cooling solutions providing maximum comfort while minimizing energy consumption. Our heating & cooling solutions are for all buildings types and based on a long product brand heritage.

With effortless installation, our comprehensive range of systems is designed to provide ultimate comfort for all types of buildings in every season, while maximizing energy efficiency and ensuring long-term performance, backed by the reliability of our premium quality materials and technologies. Our range includes innovative smart solutions and prefabricated systems to guarantee time and cost savings, maintaining consistent quality at the construction site.

## Radiant Heating & Cooling

- Radiant heating & cooling systems offer ultimate comfort and energy efficiency
- Ideal solutions for residential and commercial buildings
- Renovation solutions

## Installation Systems

- Intelligent, faster and complete solutions ready to install
- Solutions to solve labor shortage, decrease energy usage and ensuring constant quality

## Controls & Digital Services

- Automated controls and smart solutions
- Increasing comfort level and maximising energy saving
- Fast adaptation and end-to-end solutions

## Energy Distribution

- Innovative and efficient range of pre-insulated plastic pipes
- The system combines excellent insulation with high flexibility and easy installation

## Innovation 2025: Uponor Siccus 16

- Perfect for Renovations with a Low Construction Height
- Direct Flooring Compatibility supports laminate, parquet and tiles directly on the EPS board
- Achieves optimal heating performance within 20 minutes
